Health and safety: EOTC policy

Understand and comply with legal responsibilities, [NAG 5](#).

Ensure that there is a health and safety policy with supporting procedures in place and that these are implemented effectively.

As part of your policy consider how you:

- identify children and young people with asthma
- ensure that emergency plans and procedures are in place
- minimise risks to asthma triggers
- plan to reduce exposure to indoor and outdoor triggers
- ensure medication is available at all times and is up-to-date
- identify emergency and first-aid procedures for children and young people with asthma
- train all new and existing staff and parent helpers to deliver asthma first aid
- maintain an emergency asthma kit.

Plan safe EOTC trips

Obtain and review the medical and health information of all participants involved in an EOTC event.

Be prepared:

- Identify specific allergens such as pollen or grass seeds, which may exacerbate an asthma attack, and plan to avoid these where possible.
- Include a spacer and inhaler in your first-aid kit.
- Check students have their inhalers with them before setting out.
- Prior to the trip, ensure parent helpers know the signs of an asthma attack and what to do during an asthma episode.

Identify and assess risks (RAMS)

Use **Tool 13: Assessing risks** with specific reference to children and young people with asthma, when planning for EOTC.

- 1 **Identify hazards** – find out the situations and things that could cause an asthma attack and/or affect treatment (Examples include: asthma triggers, access to asthma medication, asthma first-aid knowledge).
- 2 **Assess risks** – understand the nature of the risk, the consequences, and the likelihood of it happening (Examples include: anxiety, difficulty breathing, asthma attack, and distance from emergency services).
- 3 **Control risks** – implement the most effective control measures that are practicable in the circumstances (Examples include: quick access to reliever inhalers, asthma emergency kit, and cell phone).
- 4 **Review control measures** – review your asthma emergency procedures. Are they working as planned?
