

Support participation and build confidence

A suggestion for implementing the strategy

'Create inclusive learning environments '

from the Guide: [Asthma and learning](#)

Includes:

- Ask learners what helps
- Support learner wellbeing
- Create a supportive environment
- Support participation in sport
- Plan participation for all
- Useful resources

Ask learners what helps

Reduce feelings of anxiety and minimise barriers to participation.

Ask learners to share their perspectives, what works for them, and the support they need.

Find out from children and young people:

- ✓ how they want to access their asthma medication
- ✓ how they want to communicate their health needs
- ✓ activities or learning situations that increase their levels of stress or uncertainty
- ✓ the information they would like shared about their asthma and the best ways to share this
- ✓ how to support specific concerns, such as participation in exercise or sport.

Support learner wellbeing

Social and emotional wellbeing

Strategies supporting children and young people

- Asthma management plans need to be sensitive to psychosocial factors.
- Help young people acknowledge and accept the feelings they're having.
- Encourage young people to take an active role in managing their asthma.
- Teach relaxation exercises, mindfulness or meditation.

Create a supportive environment

Tips for creating
supportive
environments for
children and young
people with asthma.

- ✓ Know which children and young people have asthma.
- ✓ Have a copy of their asthma action plan.
- ✓ Recognise the early warning signs of an asthma episode.
- ✓ Provide a quiet space and/or activity to allow recovery from an acute episode.
- ✓ Support learner's transition back to learning after illness.
- ✓ Recognise when children and young people show signs of poorly controlled asthma or worsening asthma.
- ✓ Support easy access to medication.
- ✓ Connect with parents to discuss any concerns.

Support participation in sport

Exercise may trigger an asthma attack.

With proper management, a child or young person with exercise-induced asthma (EIA) can maintain full participation in most sports.

- ✓ Include warm-up exercises for 5–10 minutes prior to outdoor games and exercise.
- ✓ During cold weather, plan outdoor exercise later in the school day.
- ✓ Encourage children with EIA to use asthma medication as recommended by their health care professional, before exercising. Commonly this is two puffs of a reliever inhaler before warming up.
- ✓ Ensure children always carry a reliever in case of an asthma attack.

Plan participation for all

- Change the location of activities or adjust the type, pace, or intensity of activities during extreme weather, high pollen counts, or poor air quality.
- Provide a quiet space/activity to allow recovery from an acute episode.
- Recognise when children and young people show signs of poorly controlled asthma.
- Support easy access to medication.
- Support students and parents with classroom continuity. Keep your classroom website or blog current with what is being learned, send emails, provide reading or support material as needed.
