approaches

Create a predictable environment

Use predictable routines and systems

- Use class and personalised timetables so that students can anticipate transitions and manage themselves independently.
- Support routines and comprehension with visuals.
- Keep visuals and supports consistent over time.
- Use the same visuals, signals, language and cues across the school.
- Teach and model how to use planning and scheduling tools.
- Make visuals and resources easy to find by using clearly divided zones, for example a maths resources zone.

Signal and manage transitions and changes

- Use timers, timetables and visuals or task boards to clarify tasks and transitions.
- Talk through last minute changes that may be startling to students.

approaches

Use visual timetables

Visual timetables support spoken instructions, provide a reference point for "what next" and show changes in routine.

Introduce tools such as visual timers to reduce surprise that an activity is over or to signal that a transition is coming.

approaches

Use social stories

Social stories explain a particular situation, event or activity, which can act as a social learning tool.

- ✓ Gather information to understand the context, skill, achievement or concept that will be the focus of the story.
- ✓ Clarify the positive model, steps or scenarios that you, the ākonga, whānau and team want to develop.
- ✓ Develop a social story, preferably with personalised text and images.
- ✓ Share the story with the student. Give plenty of time and repetition for understanding to develop.
- ✔ Practise skills in a structured teaching situation and then in everyday situations.
- ✓ Check for and support generalisation, where the new skills are used in different situations.
- ✓ Social Stories by Carol Gray are a type of social story that meets 10 quality criteria. See some examples at Social Story Sampler - Carol Gray.

approaches

Use visuals for self management

Build a shared understanding of the meaning of the visuals you use as some ākonga may focus on unexpected parts of the image.

- ✓ Make visuals of daily tasks, processes and steps.
- ✓ Label resources with visuals, colours and text for easy identification.
- ✓ Use charts, visual calendars, colour-coded schedules, visible timers, and visual cues to increase the predictability of regular activities.
- ✓ Offer graphic organisers and flowcharts to break tasks into shorter chunks.
- ✓ Use visuals and video models to support learning of new skills or behaviours.
