Take a multi-sensory approach

Offer students multiple opportunities to build understanding using all their senses.

- ✔ Take a multisensory approach – use real experiences, physical activities, and manipulatable objects to support understanding.
- ✔ Support text and spoken information with photos, graphics, audio, and video.
- ✔ Present digital text rather than printed text, so that students can personalise it (for example, by enlarging it or listening to it).
- ✔ Use blogs, wikis, and online tools such as Moodle to bring together different versions of content in one place (for example, a YouTube video, a graphic, and some text within a webpage).
- ✔ Make instructions, demonstrations, or key content rewindable and accessible 24/7.
