Utilise cooperative learning groups

Successful cooperative learning groups:

- can be teacher-selected to ensure balance, inclusion, and productivity
- can be formed around target students with supportive peers
- are no larger than four students
- give students specific roles, for example, using [cooperative group role cards](#)
- can be changed periodically. It can take students some time to build relationships. Think about changing groups to extend the relationships your target students have.

Jigsaw learning

The **Jigsaw approach** in action in a year 5–6 class. Expert learners are deliberately grouped with those that need support.

Reciprocal teaching of reading

Reciprocal teaching of reading is effective in improving the achievement of learners from diverse backgrounds.

The structured small-group approach (where students have specific roles) provides a tool for supporting students to interact and collaborate successfully.

It involves four explicit strategies for reading comprehension:

1. Formulating questions to stimulate thoughtful discussion.
2. Clarifying ideas and information in the text.
3. Predicting what might follow, using prior knowledge and information in the text.
4. Summarising information in the text.

Peer tutoring

Peer tutoring is a form of cooperative learning where two students work together – a more skilled "tutor" with a less skilled "tutee".

Benefits for students:

- ✓ more individual teaching
- ✓ gains in learning
- ✓ gains in social/relationship skills
- ✓ improved attitudes towards learning
- ✓ improved self-esteem .

Benefits for tutors:

- ✓ practice/reinforcement of skills at earlier levels
- ✓ learning gains
- ✓ insight into the learning process
- ✓ development of social/relationship skills
- ✓ development of responsibility
- ✓ development of self-esteem.

Benefits for teachers:

- ✓ more effective use of time
- ✓ greater coverage of individual needs
- ✓ opportunities to observe students at work, and to assess skills.
