

# Create barrier-free goals and objectives

A suggestion for implementing the strategy

'How to plan using UDL' from the Guide:

[Universal Design for Learning](#)

---

## **Includes:**

- Clarify learning intentions
- Check for hidden barriers
- Share goals in multiple ways
- Co-design authentic goals
- Reflection questions
- Useful resources

## Check for hidden barriers

Barriers to achievement can be hidden in the way we communicate goals or learning intentions.

Example of an assignment:

*Students will be able to write a report about how ways to increase birdlife at school.*

This is two tasks in one: **write** a report and **demonstrate** understanding about birdlife in the local area.

When setting goals (intentions):

- identify the purpose and make explicit what will be assessed
- check for hidden barriers to achievement
- if possible offer students flexible ways to demonstrate understanding
- if a skill such as “write” is included in the goal, ensure supports such as text-to-speech, graphic organisers, word prediction are offered to all students.

---

## Reflection questions

Consider the following in your own context.

How can I present learning goals and intentions in varied and flexible ways to support engagement and understanding?

How can I make sure students don't confuse the purpose of an activity with the means of achieving it?

Do I offer varied, flexible, and supported pathways to success? Give examples.

### Goals are separate from the means when possible

Barriers to participation and success can be hidden in the way we write or express goals, learning outcomes and success criteria. This step-by-step guide can help teachers design and express barrier-free goals.
