

# The recognition network and making sense of information

A suggestion for implementing the strategy  
'Provide multiple means of Representation'  
from the Guide: [Universal Design for Learning](#)

---

## **Includes:**

- Understand the recognition network
- Implications of variability
- Guidelines to help us plan for variability
- Potential barriers
- Summary
- Useful resources

## Understand the recognition network

An introduction to how we perceive and make sense of information in different ways.

## Implications of variability

When we present information in only one way, we create barriers for students and limit learning opportunities.

No single medium works for every learner, nor does it for every subject....To promote understanding of information, concepts, relationships, and ideas, it is critical to provide multiple ways for learners to approach them.

# Potential barriers

The presentation of information can impact access, participation, and engagement.

Potential barriers for students could be:

- ✓ decoding text
- ✓ information presented in one format
- ✓ materials that are unable to be adjusted, personalised, or customised for learner preference
- ✓ unfamiliar vocabulary
- ✓ text not in first language
- ✓ unfamiliar or complicated language
- ✓ unfamiliar symbols and new concepts
- ✓ little background knowledge to build upon
- ✓ materials are only available online
- ✓ low vision
- ✓ physically accessing materials, for example, turning pages, navigating digital content
- ✓ delivery method – for example whole class, small group.

## Summary

A young man with short dark hair is looking at a tablet. A thought bubble is positioned over the tablet screen. The thought bubble contains the text: "The teachers value that I do things differently. It's great to get content I can adjust easily." The tablet screen shows a list of music genres: "Download", "Base", "lone", "Rap &", "Lam...", "Pop", and "Pon".

**Representation**

Flexible information and content that can be personalised.

Supporting understanding and decoding.

Activate background knowledge and support critical thinking.
