

Adrenaline auto-injectors

Adrenaline auto-injectors contain a single, fixed dose of adrenaline.

Adrenaline auto-injectors are designed for use by anyone, including people who are not medically trained.

In New Zealand, there are two doses of adrenaline auto-injectors available:

- EpiPen®Jr (usually prescribed for children 10–20 kg.)
- EpiPen® (usually prescribed for adults and children over 20 kg.)
