approaches

Create a predictable environment

Use predictable routines and systems

- Use class and personalised timetables so that students can anticipate transitions and manage themselves independently.
- Support routines and comprehension with visuals.
- Keep visuals and supports consistent over time.
- Use the same visuals, signals, language and cues across the school.
- Teach and model how to use planning and scheduling tools.
- Make visuals and resources easy to find by using clearly divided zones, for example a maths resources zone.

Signal and manage transitions and changes

- Use timers, timetables and visuals or task boards to clarify tasks and transitions.
- Talk through last minute changes that may be startling to students.
