Design the physical environment to support self regulation

A suggestion for implementing the strategy
'Collaboratively develop a safe and caring
culture and climate' from the Guide:

Behaviour and learning

Includes:

Design for connection

Consider sensory sensitivities

Reduce anxiety

Create peace corners

Self assessment

Design for connection

"The environment needs to be conducive to you making a connection so that mutual trust, respect, all those things, can occur."

Consider sensory sensitivities

Consider how the organisation of the learning space could be a trigger for certain behaviours.

Discuss your ideas with students and develop agreed solutions.

Possible triggers	Possible solutions
Resources or materials difficult to find.	Label and colour code resources.
Unpredictable noisy entry into the classroom.	Develop classroom entry protocols.
Cluttered chaos of bags and coats.	Establish a protocol for how bags will be managed.
Classroom layout keeps changing without warning or collaboration.	Discuss changes with students and agree on a time frame for changes.

Reduce anxiety

Reduce the stress of moving into new spaces by transferring specific furniture or items of importance to the learner.

Create peace corners

Involve students in designing quiet, safe spaces to retreat to so they can calm and organise themselves.

Self assessment

Are these strategies emerging, partly in place, or established in your practice?

Illustrate your response with examples from your own teaching.

My relationships with students are warm and caring, reflecting the values of manaakitanga and whanaungatanga.

Visual images and resources reflect and celebrate cultural diversity.

The learning space allows ease of access and movement, and minimises crowding and distraction.

Equipment and materials are clearly labelled, and there are established routines for students to collect and return them.

There is a neutral space available where students can go to calm down if they need to.
