

# Functional Behaviour Assessment

A Functional Behavioural Assessment can help identify the relationship between a behaviour and the context in which that behaviour occurs.

A simple Functional Behavioural Assessment is a systematic, evidence-based process.

1. Describe the behaviour.
2. Identify the antecedent.
3. Identify the consequence.
4. Identify the function of the behaviour.
5. Check for setting events (other things going on in the student's life) and write a hypothesis.
