

# Plan a response

A suggestion for implementing the strategy  
'Understanding how to respond to problem  
behaviour' from the Guide: [Behaviour and  
learning](#)

---

## Includes:

- Questions to consider
- Strategies that meet student needs
- Plan a response
- Use the guide strategies

## Questions to consider

Use these **questions to support planning an appropriate response** to consider which aspects of the learning and social environment are working well and which need changing or strengthening.

Unpack what the student is trying to communicate, and what the purpose of the behaviour is.

- ✓ Do my or other students' responses to the behaviour unintentionally reinforce it?
- ✓ What might be a better way to respond? (For example, that doesn't give the behaviour undue attention or allow the student to avoid important opportunities for learning).
- ✓ Do I ensure that tasks are manageable, achievable, and as motivating as possible?
- ✓ Does the student have the necessary skills and materials to be successful at this task?
- ✓ If not, what scaffolding, additional support, or resources could I provide?
- ✓ Do I provide opportunities for the student to receive positive peer attention?
- ✓ Do I ... view [further questions](#) >>

## Strategies that meet student needs

The way we respond to a behaviour has a significant impact on the occurrence of the behaviour. Identify strategies to implement that meet the student's needs and lead to positive behavioural change.

This could include:

- ✓ removing or decreasing the antecedent event, where possible
- ✓ encouraging the use of a personal management strategy, for example, take a walk or a break in a quiet space
- ✓ modifying a task to prevent a particular behaviour – identify student preferences and modify a task so that it incorporates student interests
- ✓ changing task difficulty
- ✓ teaching alternative behaviours that meet the same purpose, for example, if the purpose of the behaviour is to avoid doing something difficult, teach strategies for managing the task or ways the student can make the task less difficult
- ✓ changing how instructional content is presented, for example, present a variety of brief activities instead of one longer task
- ✓ increasing opportunities for choice
- ✓ providing predictability to reduce anxiety and stress, for example, display daily schedules on a visual calendar, model new tasks, and rehearse upcoming events.

## Use the guide strategies

Use the strategies within this guide to plan approaches that enable students to participate in learning in ways that work best for them and that are responsive to their needs.

- ✓ [Foster positive relationships and partnerships](#)
- ✓ [Collaboratively develop a safe and caring culture and climate](#)
- ✓ [Support language and communication skills](#)
- ✓ [Support emotional wellbeing and positive mental health](#)
- ✓ [Enable access and participation in learning](#)
- ✓ [Respond safely to challenging situations](#)
