## Challenges and frustrations

Young people with brain injuries explain their difficulties and frustrations.

- I study for twice as long as I used to, but I'm doing much worse.
- I can't remember anything I read no matter how many times I re-read the same thing.
- I study hard and feel like I know the material. Then I go into the test and can't come up with the answers.
- Essay exams are murder. I need 20 minutes to think of what I want to say and then the time has run out.
- I get so tired I can barely get through the school day. At night, I'm just too tired to do my homework.
- I'm so distracted. I can pay attention for five minutes and then my mind wanders.
- I go to every class, but nothing sinks in.
