

Notice where support is needed

Many of the symptoms of concussion can often be misinterpreted as negative behaviour.

Instead, these symptoms are signals that a brain is still healing and needs a supportive environment to aid recovery.

- ✓ Feeling tired
- ✓ Wants to sleep a lot
- ✓ Yawning; dozing off
- ✓ Late arriving
- ✓ Daydreaming; looking blank
- ✓ Doesn't "seem like his/herself"
- ✓ Easily frustrated
- ✓ Shows no interest in playing
- ✓ Unusually emotional
- ✓ Sore head or other pains.
