### Understand what makes a difference

The most effective approaches that positively influence student wellbeing and learning:

- ✓ promote reciprocal, learning-centred relationships with teachers and the school
- ✓ recognise, respect, and value the diverse identities, languages, and cultures of the school community
- ✓ draw on community knowledge
- **✓** facilitate joint interventions.

# **Build bridges and remove barriers**

"I think looking ahead to the future, this is the way to do learning. To combine school and whānau. If you remove the barriers and make it accessible in an environment that is safe like a marae, then it sets a platform for things."

# Invest in joint learning with whānau

Joint interventions have the greatest impact of all approaches.

They help parents or other community members support student learning and wellbeing.

They also engage teachers in professional learning and development.

#### For example:

- Reading Together® programme (Biddulph Education Trust Ltd.)
- Tilting the Seesaw for Teams (Autism NZ)
- Co-development of te reo Māori audio recordings of books, made by elders, to support children's language learning and reading
- Training parents and teachers to work together to identify how to best support children's learning
- Ākonga regularly reading their books alongside kuia and kaumatua at ELS/school
- Kaumātua or manawhenua sharing stories with ākonga and kaiako about significant landmarks and historical events in their local region

## Learn from students and parents

Mapping, drawing, and talking together builds understanding.

#### Indicators of mahi tahi

Mahi tahi or mahi ngātahi (collaboration) means working as one, with collective responsibility, commitment, and a shared focus.

Review the following statements for your own context.

Mahi tahi (working as one) is alive in a learning community when:

- the local curriculum is co-constructed with ākonga, whānau, and mana whenua to create a responsive, localised curriculum linked to te ao Māori
- learning is made visible in ways that work for both ākonga and whānau, for example, through learning stories or blogs and eportfolios
- ākonga and whānau are included in decision making, goal setting, and problem solving
- ākonga and whānau expertise is valued and community members are viewed as teachers and learners
- creative, flexible, and responsive ways to keep whānau connected (mobile technologies and community networks)
- kaiako work to understand learning and behaviour from a kaupapa Māori perspective
- kaiako are open to feedback from whānau and the wider Māori community
- kaiako actively engage with mana whenua and take responsibility for embedding their knowledge and narratives within curriculum and practice.

# **Reflection questions**

Consider these questions.

To what extent are whānau included in decisions about their children's learning and wellbeing?

How well-informed are parents about their child's learning and wellbeing, local curriculum, teaching programmes, assessment processes, and pastoral care practices?

What opportunities are there for whanau and akonga to take a lead role?

How do whanau want to be communicated with?

What kind of information do whānau find most useful to receive or to share?

How is your school community changing? How do you know and what is the impact?

What does this mean for how your school communicates with all parents and whānau, not just those who come through the school gate?
