

Design accessible online environments

Use these suggestions to design accessible and useful online environments, such as blogs, Google Sites, and moodle, for your students.

- ✓ Keep the design simple.
- ✓ Use a clear predictable structure to help students find what they need.
- ✓ Reduce visual and auditory clutter, and bling (students with ADHD and autism may also find this strategy useful).
- ✓ Support navigation with both high contrast text and visual cues.
- ✓ Check with students that the way you are organising instructions and resources is working for them.
- ✓ Hyperlink to learning support tools (for example, visual dictionaries, graphic organisers, text to speech tools).
