Model literacy learning tools

Introducing students to free or inexpensive tools that remove barriers and provide support for literacy learning.

- **Text-to-speech (TTS)** software converts text from a website or digital document into speech by reading written information aloud. The text is often highlighted with word tracking. Explore [TTS on Mac operating systems](#), [Natural Reader](#), [Read and Write for Google Docs](#)
- **Word prediction software** predicts a required word, as a student writes, producing a list of words. Explore [LetMeType](#)
- **Voice-recognition software** offers students an alternative way of getting their thoughts down on paper.
- **Clutter free web pages** . Explore [Mercury Reader](#) or use the Reader function on Mac operating systems.
- **Spell and contextual grammar checkers** . Explore [Ginger for Chrome](#).
- **Closed Captions** (subtitles). Turn them on when sharing videos with students.
- **Graphic organiser software (free)** with outlining and drafting capabilities can be used to support writers in a number of ways.
- Digital storytelling tools are available on Powerpoint and Google Sites. Movie making tools are also available.

The School Journal Story Library

School Journal Story Library is a targeted instructional series that supplements other instructional series. It provides additional scaffolds and supports for teachers to use to accelerate literacy learning for students in years 5–8 who are reading 1–2 years below expectation. The series includes books, teacher support materials, and audio.
