Supporting organisation with visuals

Suggestions for supporting students' autonomy and independence.

- ✓ Label key areas of the classroom and resources with visual and text labels.
- ✓ Use charts, visual calendars, colour-coded schedules, visible timers and visual cues to increase the predictability of regular activities, transitions between environments and activities, and changes in discussion topics.
- ✓ Make graphic organisers and flowcharts available to support breaking tasks into chunks and planning in all curriculum areas.

Offer visual timers

Visual timers, can help students "see" the time they have for a task.

This can reduce stress and increase motivation.

Ideas to support processing

Provide options to support thinking and processing.

- ✓ Pace content delivery. Give students time to process and integrate information from multiple sources – displays, interpreters, written instructions, the teacher.
- ✓ Give students multiple opportunities to engage with new ideas in a range of contexts.
- ✓ Highlight patterns, critical features, big ideas and relationships using visuals, mindmaps, 3D manipulatives, outlines, flowcharts and real objects.
- ✓ Provide extra time for students to think and process before needing to respond in a discussion.
- ✓ Support group and class discussions with visual annotations to prompt later recall of key ideas.
- ✓ Offer students a variety of graphic organisers and flowcharts to support thinking in all curriculum areas.
