Ideas to support processing

Provide options to support thinking and processing.

- Pace content delivery. Give students time to process and integrate information from multiple sources – displays, interpreters, written instructions, the teacher.
- Give students multiple opportunities to engage with new ideas in a range of contexts.
- Highlight patterns, critical features, big ideas and relationships using visuals, mindmaps, 3D manipulatives, outlines, flowcharts and real objects.
- Provide extra time for students to think and process before needing to respond in a discussion.
- Support group and class discussions with visual annotations to prompt later recall of key ideas.
- Offer students a variety of graphic organisers and flowcharts to support thinking in all curriculum areas.
