Support concept development

Build new learning on solid foundations.

Provide multiple opportunities to revisit a new idea or concept.

- ✓ Check to ensure that learners retain and can demonstrate previously-learned skills before beginning new learning.
- ✓ Teach new skills using a variety of methods, materials and contexts and using concrete, practical and visual materials.
- ✓ Reinforce abstract concepts with visual and concrete materials.
- ✓ Make explicit connections between new knowledge and previous experience.
- ✓ Make connections to high interest and practical everyday situations.
- ✓ Offer multi-sensory explanations and demonstrations.
- ✓ Provide extra time and opportunities for additional repetition and reinforcement – where applicable, involve a buddy, parents, or a support teacher.

Support attention, focus and independence

Aim to increase student independence by providing just enough support. Build these approaches into the way you teach.

- ✓ Break learning into short, focused and clearly defined tasks.
- ✓ Vary the level of demand from task to task.
- ✓ Provide clear instructions that are visually displayed and can be easily returned to.
- ✓ Vary the level of support as necessary and teach buddies how to provide support.
- ✓ Provide a variety of technologies to support learning, for example, an iPad or a computer.
- ✓ Create an activity box for times when the student needs a change of activity or time out.

Support thinking and pattern recognition

Use tools and approaches to help learners to recognise patterns, critical features, big ideas and relationships.

- ✓ Use visuals — graphics, photos, cartoons, pictures — to support text and talk when explaining anything.
- ✓ Offer 3D virtual and physical models and real objects to help ākongā identify critical features.
- ✓ Use mind maps, flowcharts, and outlines to help learners unpack big ideas and relationships.
- ✓ Give ākongā multiple opportunities to engage with new ideas and concepts.
- ✓ Provide extra time for ākongā to think and process before they need to respond in a discussion.
- ✓ Use mindmaps to brainstorm ideas.
- ✓ Support group and class discussions with visual annotations to prompt later recall of key ideas.
- ✓ Make thinking tools and approaches available across all curriculum areas.
