The simple view of reading

Learning to read

consists of developing skills in two critical areas:

1. **Word recognition** – recognising words quickly and accurately
2. **Comprehension** – understanding the language being read.

Word recognition

Teach these skills explicitly to all learners, particularly learners with dyslexia.

To build **word recognition skills**, provide:

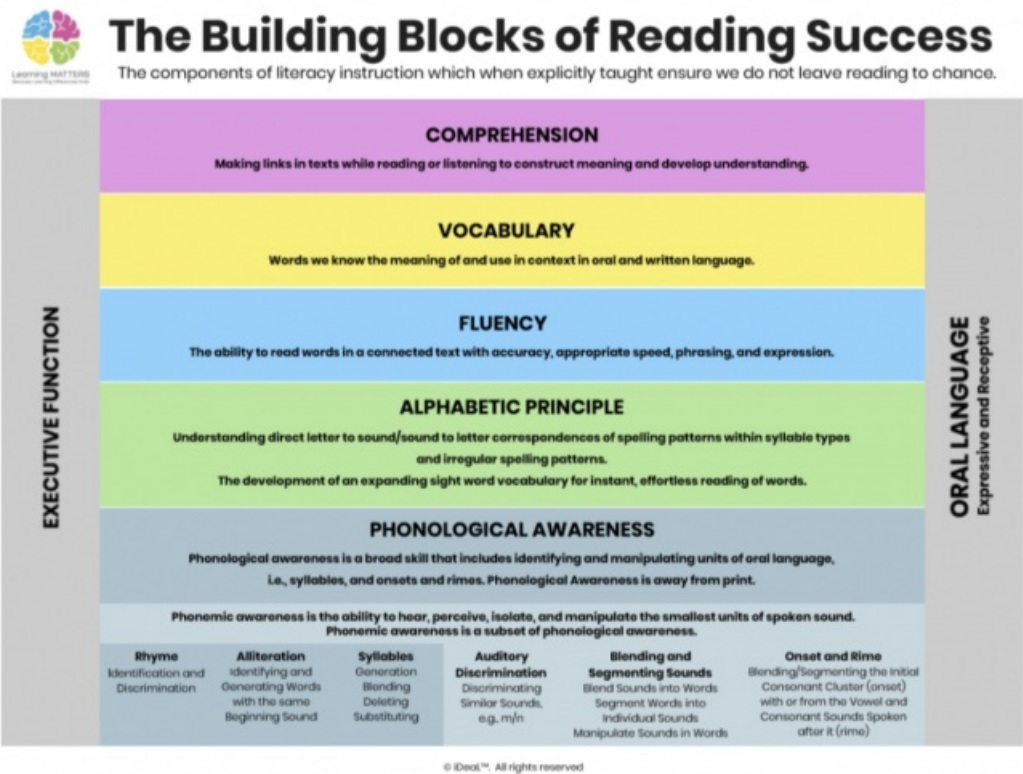

- explicit instruction in alphabetic coding skills
- opportunities to practise and receive feedback on using alphabetic coding skills while reading.

To build **alphabetic coding skills**, focus on teaching:

- the [alphabetic principle](#)
- letter knowledge
- phonemic awareness

Put reading first: The research building blocks of reading instruction

This guide contains five sections identified in the National Reading Panel Report: phonemic awareness, phonics, fluency, vocabulary, and text comprehension. Each section defines the skill, reviews the evidence from research, suggests implications for classroom instruction, describes proven strategies for teaching reading skills, and addresses frequently raised questions.

Ending the reading wars: Reading acquisition from novice to expert

Read time: 160 min

This research paper provides a comprehensive review of the science of learning to read. It covers earliest alphabetic skills to word recognition and skilled text comprehension. It includes an explanation of why phonics instruction is central to learning and a review of research, with information on how phonics informs effective classroom practice.
