Increase access to content

Suggestions to support equitable access to information and materials.

- ✓ Take a multisensory approach – use real experiences, physical activities, manipulables, photos, graphics and video alongside text or spoken content.
- ✓ Present digital rather than printed text so that students can personalise it and use tools such as text-to speech.
- ✓ Support text with clear, uncluttered visuals, audio and real objects.
- ✓ Provide enlarged photocopied versions of printed materials.
- ✓ Use blogs, wikis, and online tools such as Moodle to bring together different versions of content in one place (for example, a YouTube video, a graphic, and some text).
- ✓ Use high contrast colours for whiteboard pens, text and graphics on slides. Avoid pastel colours and grey tones on printed and online materials.

Use closed captions

Look for closed captions when viewing video and TV to increase access to audio content.

On YouTube

- Search for videos with closed captions using the Subtitles/CC filter. The filter menu box appears on the left of the YouTube search results page – that is, once you have searched on a subject, for example “frogs”, and have a list of results.
- Look for the CC symbol. It may be under the settings cog.

On TV and streaming services

- Look for TV settings or settings on each streaming service.
- The subtitles or closed caption option may be listed under Audio and subtitles, or Accessibility options.
