

# Future-proof equitable access

Plan for the diverse mobility needs of your learners and your community from the outset.

Key considerations include:

- unisex accessible toilets, positioned around the school for both adults and children
- outdoor play areas designed for students of varying sizes and weights, that can be accessed by students using wheelchairs or other mobility aids
- adjustable working surfaces, such as lab stations, desks, and workbenches, that students can adjust to the height required
- an area with no curbing for pick-up and drop-off
- vertical access to all areas of the school, supported by ramps and if needed, lifts
- motion-sensitive main entrance doors
- a low front desk in the reception area where children and people with wheelchairs can easily be seen and welcomed
- corridors and doorways that are wide enough for wheelchair users
- height of windows and windows in doors, enabling wheelchair users to see through.
