Start early

Future pathways and careers education starts at Years 7 and 8.

Specific transition planning also needs to start early to allow time to prepare students and their whānau for life after school. Document skills, experiences and qualifications to show progress over time.

“Support learners/ākongā to see the connections between what they are learning and the world of work.”

Make a future-focused plan

Plan for the future and build skills for independence and life after school throughout the school years.

Support student-centred planning with tools such as talking mats, visuals and choice boards that help students make decisions for themselves.

For more about talking mats see: [What is a talking mat](#) – TalkingMats.

Plans should:

- define the vision or aspirations.
- detail the steps and actions to achieve the vision.
- be regularly reviewed and monitored.

Plans can come in a variety of formats. They may include:

- Individual Education Plan (IEP) to outline current, long-term and transition goals.
- Individual Transition Plan (ITP) developed in senior years to identify and address skill building for independence.
- Individual Career Plan (ICP) for employment and financial independence, community participation, home and living arrangements, independent mobility, peer relationships, sexuality and self-esteem.

Use a person-centred planning process

Kataraina Pipi describes the unique way she uses the PATH planning tool in Aotearoa. PATH is a person-centred tool that can be used for strengths-based planning.
