

# Use technologies

Use classroom and assistive technologies to enable learning.

Technologies can:

- provide language and visual support that can be revisited as often as required
- allow information to be presented in multisensory ways and adapted to individual needs, supporting independence
- provide a combination of visual and auditory stimuli
- provide closed captions to access audio and support the development of literacy skills
- allow students to learn at their own pace and revisit content as often as they like to consolidate learning
- offer a range of differentiated content, presented flexibly to meet individual learning requirements.
