Support students' voices

Set up a range of whole-class strategies that care for students' voices.

Evaluate the effectiveness of these and alter them to meet particular student's needs.

- ✓ Reduce situations where students are shouting. For example, loud play or yelling across the room.
- ✓ Reduce situations where the student is talking over noise.
- ✓ Teach students about voice volume expectations for different settings in the class and school. For example, the use of inside and outside voices.
- ✓ Model a soft voice.
- ✓ Move closer to the student before initiating a conversation.
- ✓ Teach and encourage students to move closer to people before talking, rather than shouting across the room.
- ✓ Schedule periods of quiet activities to give students' voices a rest.
- ✓ Encourage students to stay hydrated.
- ✓ Use free online classroom voice level indicators, such as Classroomscreen.

Know the unique needs of your learner

He mana tō teina, tō teina – every learner is unique. Work with ākonga and whānau to understand the unique needs and preferences of learners.

The thing that annoys me, and people don't realise, is that I actually really enjoy public speaking. People think I'm nervous but I'm not.

Tane, 17, speaks about assumptions made by his teachers and peers, because he stutters.

Use helpful strategies for people who stutter

16 to 24 year-old New Zealanders who stutter have identified these helpful teaching strategies and ranked them in order of perceived helpfulness.

- ✓ Understand the difference between struggling, for example, avoiding certain activities or words for fear of stuttering, and stuttering.
- ✓ Give ākongā time to think and talk without interrupting or finishing their sentences.
- ✓ Create a safe and relaxing learning environment.
- ✓ Treat students the same as others. Don't exclude them from activities.
- ✓ Allow simple answers, for example, yes or no answers.
- ✓ Work with ākongā and whānau to understand student needs and create specifically designed plans to suit.
- ✓ Know about stuttering and ākongā needs.
- ✓ Take pressure off ākongā by letting them know they don't have to say anything if they don't want to.

Identify voice difficulties

A student's voice may be affected by difficulties with pitch, loudness or quality. Seek specialist support for the range of voice difficulties through Ministry of Education speech-language therapists.

Children may benefit from support where the family, whānau or educators are concerned that the child has a problem with their voice that makes it hard for them to talk, for example, they might have an extremely husky voice or keep losing their voice.
