Support literacy skills

Susan Lee describes the impact of using **Storybird** on literacy development. The tool removes the barrier of handwriting, freeing up ākonga to write.

Useful technologies

Break writing processes into a number of discrete activities that are done one at a time, and remove barriers by using appropriate technologies.

- ✓ Support ākonga by using speech-to-text so that they can communicate their ideas effectively.
- ✓ Use recording devices to record ideas orally.
- ✓ Use planning tools and mind maps to organise ideas and provide a structure.
- ✓ Use apps, such as [iWordQ](#) to support reading text, word selection, spelling, and grammar.

Ideas for improving boys' writing

Anna Swann, from Holy Cross School, explains how using Google docs in class supported learners' writing.

Take a multi-sensory approach

Offer learners multiple opportunities to build understanding using all their senses.

- ✓ Take a multisensory approach – use real experiences, physical activities, and manipulatable objects to support understanding.
- ✓ Support text and spoken information with photos, graphics, audio, and video.
- ✓ Present digital text rather than printed text, so that ākonga can personalise it (for example, by enlarging it or listening to it).
- ✓ Use blogs, wikis, and online tools such as Moodle to bring together different versions of content in one place (for example, a YouTube video, a graphic, and some text within a webpage).
- ✓ Make instructions, demonstrations, or key content rewindable and accessible 24/7.

Share learning using technology

Ākonga from Point England School use technology to learn, and share their movies with the wider community
