Understand threats to wellbeing

Design toilets with physical and emotional safety in mind.

Many LGBTQIA+ students:

- have experienced verbal slurs relating to gender identity
- are worried about threats of physical harm or harassment
- feel uncomfortable getting changed in front of others
- are unable to access a space aligned to their gender identity
- “hold on” or have to travel longer distances to get to assigned safe spaces
- need to change in spaces with peers who have caused harassment.

Ask students about their experiences

Consider the impact of student experiences on learning. Ask them how you can help.

When I was about nine I had an incident at school where another girl said,

“Aren’t you in the wrong toilets?”

So I stopped using toilets in public altogether.

It was such an awkward experience and I didn’t want to repeat it so I just stopped drinking water and went to the toilet at home.
