Support learning at home

Strategies for helping families support their children's learning at home.

- Meet face-to-face to model particular strategies or make a video to model a particular strategy or approach.
- Create opportunities where students can draw on the expertise and experience of their family and work together on a project.
- Maintain a class blog or a weekly email to families, where you share the class focus and encourage them to share resources and ideas.
- Avoid setting up situations where you are encouraging families to supervise homework. Parents are not always comfortable helping their child with academic studies.
