

Consider classroom layout

Design your classroom layout to support students with varying learning needs and preferences in their collaboration.

- Choose a flexible layout that adapts to the learner, rather than limiting the learner.
- Offer seating patterns, configurations, and spaces to facilitate social exchanges among students alongside quiet reflection time.
- Provide a variety of technologies to support participation, communication, and collaboration.
- Use visual supports such as timers, visual displays, and graphic organisers to support self management.
- Provide different types of furniture to support students' varying physical needs and preferences (for example, wobbly stools for students who move to concentrate).
