

Useful resources

Teachers

Teachers in a range of subjects describe their innovative internal assessment practice in short videos. Teachers describe assessing their students' achievement in integrated and cross-curricular learning situations, or via project-based learning where students have agency to solve a problem through a project, or through personalised assessment in response to learning grounded in the student's context. Discussion questions are included.

Students

Students whose learning has been the subject of innovative assessment describe how their learning is now more engaging. They outline the difference it makes when they can choose the context – whether that's based on a personal interest, a familiar situation or part of a personal interest project – and speak about achieving beyond their own expectations. Discussion questions are included.

Connections between subjects and career pathways

Ki hea rā? (Where to?) are downloadable posters which show the connections between classroom learning and young people's aspirations. Use them to bring subjects to life by making connections between the curriculum and career pathways. They are useful for ākonga and their whānau when considering subject choices.
