What are expert learners?

In a UDL context, expert learners are:

- ✓ **puposeful and motivated** (they can manage themselves when they get stuck, collaborate with others, focus on a task, are resilient)
- ✓ **resourceful and knowledgable** (they can find and curate information, connect ideas to create new understandings, transfer understandings across contexts)
- ✓ **strategic and goal-directed** (they can break-down a task, manage deadlines, organise resources, communicate thinking).

Who can be expert learners?

Developing expertise
applies to everyone.

The goal of developing expertise applies to all participants: students, teachers, and all of the personnel in the system itself.

If everyone is focused on developing expertise as a learner, the context is suffused with great models.

Anne Meyer, David H. Rose, and David Gordon

Reflection questions

How does the idea of expertise in learning impact on your thinking?

How could the idea of expert learners impact your practice?

How do students develop expertise as learners?

What attitudes and habits indicate that learners are developing expertise?
